Education

Technische Hochschule Bingen, Germany <i>M.Sc. in Computer Science</i> Expected Coursework: Architecture of Information Systems, Systems Analysis, Advanced Database Systems, Advanced Software Engineering	October 2026 – Present
Technical University of Dresden, Germany <i>M.Sc. in Computational Modeling and Simulation (Logical Modeling Track) – Transferred</i> Completed Coursework: Advanced Logical Modeling, Machine Learning and Data Analysis, Knowledge Representation, Foundations of Data Visualization	October 2024 – September 2026
MET’S Institute Of Engineering, Pune University <i>Master in Computer Application</i>	June 2020 – May 2022
Ashoka Center For Business And Computer Studies, Pune University <i>Bachelor in Computer Science</i>	July 2017 – May 2020

Work Experience

Buzinesscare IT Services Pvt. Ltd., Nashik, India (Remote) <i>Full-Stack Developer Trainee – Development Department</i> • Spearheaded full-stack development tasks for core enterprise ERP modules within an agile engineering environment, accelerating sprint delivery velocity by 15%. • Integrated responsive user interfaces using modern JavaScript frameworks alongside scalable backend components, reducing frontend loading latencies by 20%. • Architected optimized data schemas and collaborated with a cross-functional team of 5 developers to build and deploy 4 functional application modules.	Experience June 2023 – January 2024
Catapharma Chemicals Pvt. Ltd., Nashik, India <i>Full-Stack Software Developer</i> • Architected core enterprise ERP modules using React.js and Node.js to automate business workflows. • Developed modular REST APIs and responsive web interfaces to optimize the end-user application UX. • Maintained MySQL databases and minimized query latencies using performance tuning via DBeaver . • Collaborated with cross-functional stakeholders to gather specifications, ensuring seamless testing and deployment.	Experience April 2022 – April 2023

Skills & Languages

Programming Languages: Java, Python, JavaScript, PHP, C#, C++, SQL
Frontend Development: React.js, HTML5, CSS3, Web Development, WordPress (CMS)
Backend & Deployment: Node.js, Express.js, RESTful APIs, Postman, Render (Cloud Hosting), JSON, XML
Databases & Tools: MySQL, DBeaver, Git, GitLab, ERP Architecture, Microsoft Office Suite
Core Concepts: Machine Learning Concepts, Agile Workflow, Systems Analysis
Languages: English (Fluent), German (Basic/Intermediate), Marathi (Native), Hindi (Native)

Projects

Enterprise ERP Management Platform <i>React.js, TypeScript, JavaScript, Node.js, RESTful APIs</i> • Architected modular ERP components and dashboards tracking 10,000+ real-time data points. • Developed automated API tests via Postman , reducing validation errors by 40% before deployment.
Metro Transit & Ticket Management System <i>Java, SQL, Relational Databases, Object-Oriented Programming</i> • Built a Core Java booking app with multi-threaded validation, cutting processing latency by 20%. • Designed relational schemas via DBeaver , improving overall data integrity metrics by 30%.
Digital Beauty Parlour Platform <i>PHP, MySql, Web Development, Render Cloud Hosting</i> • Developed a full-stack booking web platform with an automated algorithm that eliminated 100% of scheduling conflicts. • Managed MySQL backend databases and deployed end-to-end on Render with 99.9% uptime efficiency.

Activities & Leadership

• Technical Peer Mentoring: Volunteered to assist incoming students with computing curriculum navigation, breaking down complex technical concepts to foster a collaborative learning environment.
• Cultural Representative: Served as a cultural representative for my home country at university-level connection initiatives, driving cross-cultural communication and engagement across a diverse student body.
